

Another reason to smile

Your United Concordia Dental plan includes implant coverage.

Your employer selected a United Concordia plan that includes coverage for dental implants. Implants are a long-term, effective way to replace teeth lost to injury or disease.

Implants can enhance your smile, too. They feel natural, often help with chewing and speaking, and help preserve the health of the surrounding bone and gums.

Your implant coverage includes:

- Imaging such as X-Rays or CT scans.
- Surgery for implant (body) placement.
- Bone grafts at time of placement.
- Implant abutments.
- Implant-supported removable, fixed-partial and complete dentures.

Dental implant structure

Single-tooth crowns that attach to an implant are included in your coverage. Your dentist can go over all the details with you ahead of your procedure.

Your dentist will help you with implant care.

Once you have an implant, keep up with your dental appointments so your dentist can monitor your oral health and ensure the long-term success of your implants. Periodically clean the implant surface above the gum and surrounding tissue. Routine brushing and flossing will help your teeth around the implant remain healthy.

Good advice is close to home.

United Concordia's large, national provider network means there's always an in-network dentist close to home who can advise you on implants. Chances are, you'll find two or more in-network dentists within 10 miles of where you live or work.

How your plan works.

Your share of costs depends on your plan's annual maximum. This is the amount that your insurance will pay for services and treatments during a plan year. You can ask your dentist for a free cost estimate, called a predetermination.

Check your benefit documents for your specific plan details.

The Plan complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex.
